3, I. Chavchavadze Ave., 0179, Tbilisi, Georgia

In the report presented at the conference deals with the urgent issues of the recreational nature management on the landscape and nature-component basis. Landscape-recreational assessment criteria have been identified. The index of recreational utilization of Georgia has been evaluated and the categories of recreational capacity of natural-territorial complexes have been distinguished aiming at the tourism and recreational organization. The principles of nature management optimization have been elaborated.
