Chavchavadze ave. 3, Tbilisi, Georgia

We have developed Georgian language support package package GeoTeX[1] for TeX/LaTeX [2] typesetting system in 2012. Mkhedruli uppercase letters were added to UNICODE since 2017 and is already implemented in modern programs. In this work we have added Mkhedruli uppercase to GeoTeX [2] . We have improved Georgian hyphenation patterns. Support for bibliography is also added.
